FEEL THE DIFFERENCE

RAUFILAM SLIDETEC SOFT

The innovative industrial hose SLIDETEC SOFT is made of high-quality, environmentally friendly and non-toxic materials. Thanks to its robust composition, the hose is extremely strong and pressure-resistant. The diagonal reinforcement ensures consistently robust quality under pressure – no twisting and distortion and no change in length or diameter.

The special surface gives the SLIDETEC SOFT an incomparable feel and guarantees easy handling when rolling up the hose, which is an advantage with automatic hose reels. The hose is highly flexible even at low temperatures in outdoor settings. The SLIDETEC SOFT has proven especially suitable for use with pneumatic tools.

Material:

Inner layer: RAU-PVC 7806, black

Outer layer: RAU-PVC 7058, blue RAL 5015

The hose has been filed for patenting.
